# Drone Technology Services

High Quality HTG 3D Model

HTG's DJI Matrice 200

Low Quality State Provided Aerial

High Quality HTG Aerial Photo

Hydro-Terra Group (HTG) provides superior drone technology services throughout the Mid-Atlantic Region. HTG uses its high quality DJI Matrice 200 drone, DJI Zenmuse X5S camera, and DJI Zenmuse XT2 R thermal camera to collect high quality aerial photos and thermal data. PIX4D and ArcGIS software is used to process the data and create orthomosaics, custom maps, and visually appealing 2D and 3D models.
